

- Richard Feynman was born May 11, 1918 in Queens, New York.
- He attended MIT and Princeton University where he got his Ph.D. in physics.
- Feynman worked on the Manhattan project during world war II, helping to develop the atomic bomb.
- After world war II he joined the faculty at the California Institute of Technology, where he made significant advancements in quantum electrodynamics.
- He was awarded the nobel peace prize in physics in 1965.
- Feynman was also an exceptional communicator.
- He became famous for his engaging lectures and books, including the popular "Feynman Lectures on Physics".
- His ability to convey complex scientific concepts in simple and relatable terms earned him a devoted following among students and the general public.
- Feynman was also known for his love of music, bongo drumming, and sense of humor.
- He passed away on February 15, 1998.
